

**NCC Information re works proposed for Carriageway Repairs at the Forge Estate starting on 23<sup>rd</sup> July 2022 for three days**

As part of Northumberland County Council continued improvements of roads and footpaths within Northumberland, Forge Estate, Ulgham, has been identified as requiring patched carriageway repairs which will assist with the overall structural integrity of the road.

Please be advised that these works are not a full resurface of the road area but planned patching works, generally larger in size than other previous repairs and designed to extend the overall life span of the road in question.

Works are planned to commence on 25/07/2022 under Chapter 8 Traffic Management and should last up to 3 Days.

Whilst every effort is made to reduce disruption for the residents, there may be times when residents will have restricted access for vehicles, however pedestrian access will be achievable at all times as will access for emergency vehicles.

Due to the type of work required there may be times residents will need to move vehicles from the carriageway to ensure that there are no delays to operations.

The County Council would like to thank residents for their co-operation during this time. See map below:
