Deb Wilson	X	
David Towns	X	
Nick Johnston	X	
Diego Perera		X
John Hill	X	
Thomas Morstyn	X	
Christopher Artist	X	
Emma Burton	X	
Anda Baumerte	X	

---

## Meeting Minutes

### 1. Funding Opportunities

Innovate UK contacted Adrian Jonas (Lead Applicant) to inform the working group that the application result, which was due 17<sup>th</sup> June will has not yet been sent out.

Adrian will distribute the result to all working group members and external partners as soon as he hears back from Innovate UK.

### 2. Community Engagement

Adrian and other working group members help setup the Jubilee weekend, where leaflets of the proposed plan of action were distributed among Jubilee attendees.

Some initial conversations with other village residents at setup indicated a strong interest in a resilient project within Ulgham. Beyond that, engagements demonstrated a wider interest in how the energy resilience project could secure internet connectivity in difficult times. It was highlighted that modern living depends on the internet, and residents suggested that this should form part of the project.

### 3. Northern Powergrid Involvement

Adrian met with our external partners at northern power grid (listed) on the 06<sup>th</sup> June 2022. Chris will be the contact point for all queries regarding the DNO and the Ulgham Village resilience project.

Northern Powergrid have said that they will write a letter of support for Moxie Energy Group and all future activities within Ulgham to help build Energy Resilience. As an initial first step, Northern Powergrid has begun to monitor “the croft” substation within the village.

Northern Powergrid will be writing an innovation proposal for the village. Adrian has produced a single page proposal for the project in Ulgham for Northern Powergrid in aid of this goal.

#### **4. The University of Edinburgh Involvement**

Adrian explained the peer-to-peer trading platform which forms a significant proportion of Dr Morstyn’s work. Dave has demonstrated a keen interest in this part of the project and has suggested that Dr Morstyn could be brought in to explain what a “living laboratory” and “peer-to-peer” trading might look like within the village of Ulgham.

#### **5. The University of Dundee Involvement**

Adrian explains to what extent the University of Dundee are interested in the activities of MXG within Ulgham Village.

#### **6. Summer Placement Programme**

Adrian went into some details regarding the placement programme and spoke briefly about the details of the individual projects occurring.

Some of the students are working on surveying the residents within Ulgham Village.

#### **7. Date of Next Meeting**

Not Discussed.
